**DETAILED ACTION**

***Priority***

1. This application has no priority claim made. The filing date is 03/31/2004.

***Election/Restrictions***

1. Restriction to one of the following invention is required under 35 U.S.C. 121:
  - a. Claims 1-10, 11-14 and 15-22 drawn to electrical computers and digital processing systems: multi-computer data transferring, particularly demand based messaging in computer conferencing, classified in class 709, subclass 206.
  - b. Claims 23-24 drawn to electrical computers and digital processing systems: multi-computer data transferring, particularly network computer configuring, classified in class 709, subclass 220.
2. The invention are distinct, each form the other because of the following reasons:
  - a. Inventions a and b are related as subcombination disclosed as useable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention a has separate functions such as receiving electronic message, accessing meta information, retrieving and storing portion of fact information; invention b has separate functions such as receiving input to identify a class of stored fact information and storing a class of fact information for accessing. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purpose as indicated is proper.

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Refer to the enclosed PTO-892 for details.
